COMMEMORATING THE GENOCIDE AGAINST THE TUTSI OF RWANDA IN 1994

A MONUMENT IN CANADA'S NATIONAL CAPITAL REGION

1. Introduction

The Humura Association, a non-profit organization dedicated to advocating for the remembrance and education of the genocide against the Tutsi in Rwanda, proposes the construction of a monument in Canada's national capital region. This memorial will stand as a poignant symbol of remembrance, providing a space for reflection and serving as an educational tool for future generations to grasp the profound impact and consequences of the 1994 genocide.

2. Background

The genocide against the Tutsi in Rwanda marked a tragic episode in history, with over 1,000,000 victims systematically murdered in just 100 days. The international community's failure to intervene has underscored the imperative of preventing such atrocities in the future. Constructing this monument in Canada's national capital region will offer a lasting tribute to the victims and act as a powerful reminder of the paramount importance of maintaining peace, tolerance, and human rights.

3. Project Objectives

The primary objectives of the Tutsi Genocide Monument are:

- Honoring the memory of the victims of the genocide against the Tutsi in Rwanda.
- Promoting awareness of the consequences of hatred and discrimination, fostering a culture of peace and tolerance.
- Educating future generations on the significance of human rights and the prevention of genocide.
- Creating a space for reflection and healing for survivors and their families.

4. Project Description

The proposed monument will be a public artwork situated prominently within Canada's national capital region. The design will incorporate elements symbolizing the resilience, strength, and hope of the survivors and their communities, while also acknowledging the immense loss and pain experienced by the victims.

The monument will feature interactive and educational components providing visitors with an understanding of the genocide's historical context, its impact on survivors, and the lessons learned. These elements will include plaques, audiovisual installations, and educational materials available in multiple languages.

5. Project Implementation

The Humura Association will collaborate with local stakeholders, including the Canadian government, municipalities, and human rights organizations, to secure funding, permits, and support for the project. This collaborative approach ensures that the monument is built and maintained with the input and backing of a diverse range of stakeholders.

Phantom, a renowned consultancy firm, conducted an initial evaluation estimating the total project cost at \$2 million. This budget will cover the design, materials, construction, and maintenance of the monument.

6. Project Timeline

The proposed timeline for the project is as follows:

- 2023-2024: Fundraising and stakeholder engagement.
- 2025: Design competition and selection of the winning design.
- 2026-2027: Securing permits and finalizing construction plans.
- 2028-2029: Construction of the monument.
- 2030: Inauguration and opening ceremony.

7. Conclusion

The construction of the Tutsi Genocide Monument in Canada's national capital region will stand as a lasting tribute to the victims, reminding us of the critical importance of promoting peace, tolerance, and human rights. The Humura Association is dedicated to ensuring the success of this project and invites your support in realizing this vision for a more just and compassionate world.
